Ms.Peterson, good afternoon, we originally spoke with Jose Ojeda,Keymel Technologies and Cetco Energy Services did go online, the week of August 19,2015 and registered. I am attaching a few documents and pasting Cetco Energy services, products and technical services for waste water remediation. If you have any question please do not hesitate to contact us.

Thank you for your time yesterday. Cetco Energy Services is looking forward to working with you and your company. We have been supplying product for the power plant industry for several years. In your area, we have been treating fly ash and bed ash water for Luminant. The water is treated so they can reuse the water in loading of their trucks. Our treatment generates a non-leachable bentonite based sludge. Our website is <http://cetcoenergyservices.com/> .

Mr. Rogers,

I understand you contacted the EPA Call Center about doing business related to the Gold King Mine. EPA has developed a central repository for EPA-wide contracting information relating to the Gold King Mine incident at: <http://www2.epa.gov/goldkingmine/vendor-list>. Please visit that website for more information.

Best regards,

Cynthia Peterson
